Summary

MSc Computer Science (Data Science) student at TU Darmstadt, graduating **Apr 2028**, with **4+ years of professional software engineering experience** building B2B SaaS applications. Hands-on experience across **Vue.js, TypeScript, Java, SQL**, API integrations, and **Generative AI** features using OpenAI and Azure AI Services. Seeking Working Student opportunities in software engineering, full-stack development, or applied AI.

Education

- **Technische Universität Darmstadt** — Darmstadt, Germany
  MSc Computer Science - Data Science — *Oct 2025 — Apr 2028 (Tentative)*
- **Thapar Institute of Engineering & Technology** — India
  Bachelor of Engineering, Computer Engineering — *Jul 2017 — Jun 2021*

Experience

- **Navarambh Software Pvt. Ltd.** — India
  Software Development Engineer II — *Jul 2021 - Oct 2025*
  B2B SaaS company building a test case management platform integrated with the Atlassian Jira ecosystem.
  - Led migration from Vue 2 to Vue 3 and TypeScript across **100+ components**, introducing Quasar and modernizing the frontend architecture.
  - Built **50+ reusable UI components** used across major product modules, improving code reuse, maintainability, and development efficiency.
  - Improved data retrieval performance by **up to 40%** for critical workflows by consolidating APIs and implementing Querydsl for complex database queries.
  - Built Java backend services supporting **3 core workflows**: high-volume PDF generation, application data import/export, and data migrations.
  - Integrated **2 Generative AI platforms**, OpenAI API and Azure AI Services, to ship AI-powered product features using prompt engineering and support new client acquisition.
  - Integrated Jira through Atlassian APIs across **2 key workflows**, enabling users to create issues and access application data directly from their existing Jira workflows.
- **Frugal Testing** — India
  SDET Intern — *Jan 2021 - Jun 2021*
  - Designed JMeter load-test scenarios simulating **1,000+ concurrent users** for high-volume auction platforms and banking applications, supporting system-performance optimization.
  - Developed **10+ end-to-end automation scripts** using Java and Selenium WebDriver, expanding automated test coverage.
  - Conducted technical interviews for **20+ candidates** and mentored incoming interns on test-automation practices.

Languages & Technologies

- **Languages**: Java, TypeScript, JavaScript, SQL
- **Frontend**: Vue.js, Vue 2/3, Quasar, React.js, HTML, CSS
- **Backend & Data**: Java, Querydsl, SQL, REST API integrations
- **AI & Platforms**: OpenAI API, Azure AI Services, MCP, Atlassian APIs

Hackathons

- **Black Forest Hackathon 2026** — Germany
  5th of 14 – Code Mode for AnythingMCP (challenge by KOCH Freiburg GmbH) — *Oct 2026*
  - Built a sandboxed "Code Mode" for an open-source MCP gateway so AI agents return only final answers, cutting tool output sent to the model from **1.69 MB to 41 B** on a benchmark query.
- **Smart India Hackathon 2020** — India
  1st Place – Hand-gesture-based ATM PIN-entry system (NCR Corporation, NH447) — *2020*
